

Precision Injection Molds

Concept Molds
12273 North US 131
Schoolcraft, MI 49087
P: (269) 679-2100
F: (269) 679-2157

Experience. Innovation. Precision. Quality.

Full Service Mold Builder

- 3D Contour Programming
- High-Speed Machining
- Hard Milling
- CNC EDM
- Multi-Axis CNC Wire
- CNC Turning
- Complete Tool Build & Inspection to Customer Standards
- Rigorous Mold Sample Tryout

Facility & Design Capabilities

- Mold Flow Analysis
- 3D Part Design & Modeling
- Parametrically Linked 2D Part Drawing
- Comprehensive 3D Mold Design
- 3D Electrode Design
- Detailed 2D Mold Design
- Multi-Action Mold Function Animation
- Zeiss CMM with Probe & Vision System
- Final Data & Drawing Supplied Complete

Innovative Technology at its Best

Located in Southwest Michigan, the team at Concept Molds has the knowledge, experience, and dedication to build your complex tools. Our attention to detail, commitment to quality, and customer service make us a leader in tooling for the medical and automotive industries.

Concept Molds is equipped to handle your tooling project from the earliest stages through the finished product. We deliver continued support throughout the life of the mold. Concept Molds has the tools, experience, and desire to bring quality products to market faster and more efficiently, allowing our partners to achieve growth, success, and profitability.

Concept Molds would like to be your full-service tooling partner.
